

MONTHLY PA ANNOUNCEMENTS – COOPERATIVE

The following is an example you can use or you can make up your own. It's very important to do this at least once a month and it has the greatest impact if delivered by the Principal or Vice Principal.

FOR VIDEO 1

This is your monthly reminder that being **COOPERATIVE** is the superpower that we're learning about and putting into practice this month.

I hope you remember this month's Quazar video where the students acted **COOPERATIVE** to do something amazing – they made the tallest sand castle ever! But the first student could not do it with only their shovel. They were cooperative with their friends to use all of their tools to build the sand castle. As Quazar said, **CO-OPERATION** means working together, with other people towards a common goal... **being COOPERATIVE** is cool!

Being COOPERATIVE means getting along with one another. It means listening and understanding each other when you're working or playing together. So keep your eyes open for those kids who show they know how to co-operate and give them your vote!

Please remember to follow the golden rules of nomination... the "do-be's" and "don't be's" that are listed on the poster in your classroom.

Remember – if we work together and are **COOPERATIVE** we can achieve great things! As Quazar says, "that's the power of **COOPERATION!**"

FOR VIDEO 2

This is your monthly reminder that being **COOPERATIVE** is the superpower we're learning about and putting into practice this month.

I hope you remember this month's Quazar video where the students on opposite moons were working on a science project to build big enough towers with ginormous mirrors so they could see each other for the first time.

The problem was they couldn't agree on how to angle the mirrors... Quazar to the rescue...using the Quazar-mobile space ship and a student from each moon, they flew high above the planet so they could see both sides clearly and give instructions to the kids at each tower. By co-operating and listening to each other, they found the perfect angles and presto! It worked.

Quazar summed it all up by saying, "sometimes you need to rise above a problem to really see how to co-operate".

Being COOPERATIVE means getting along with one another. It means listening and understanding each other when you're working or playing together. So keep your eyes open for those kids who show they know how to co-operate and give them your vote!

Please remember to follow the golden rules of nomination... the "do-be's and don't-be's" that are listed on the poster in your classroom.

As Quazar says, "it looks like my work here is done, Catchya later."
